

Solid Waste Management

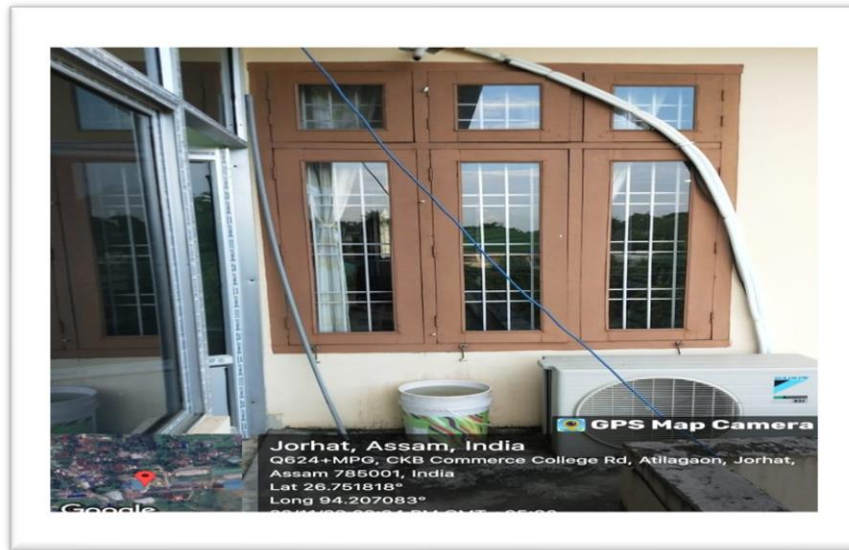

Dry waste collection bins

Dustbins placed all around the college campus

Liquid waste management

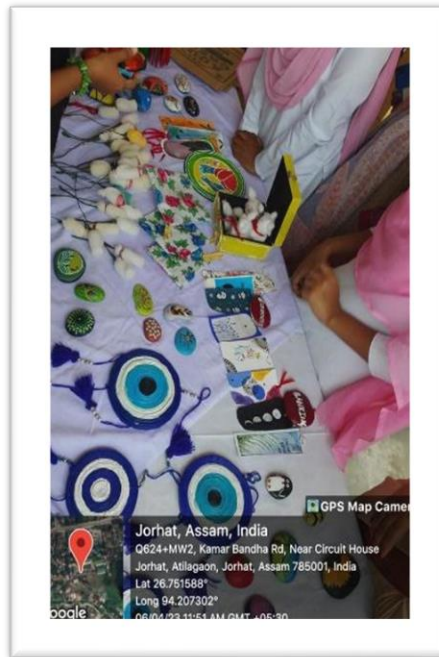

Waste water is collected from air conditioners in buckets and repurposed for watering the plants in the college garden.

Biomedical waste management

A sanitary napkin incinerator machine is employed to safely dispose of used napkins, available in the Girls' Common Room.

Waste recycling system

Decorative items prepared by students from various waste materials.

The discarded peels of vegetables and fruits, along with leftover food waste from the Girls Hostel, are collected by an individual involved in animal husbandry.
